LG300

REVERSIBLE PLATE COMPACTOR

AVAILABLE FOR RENT AT

www.atsequipment.com

The LG300 forward and reversible plate compactor is an heavy-duty plate for soil applications, ideally used for compaction of backfill in pipe and cable trenches, as well as road repair and maintenance work. Speed and compaction depth are regulated steplessly via hydraulic servo control of the eccentric element. This gives the plate smooth motion and makes it very easy to operate. The design includes a strong cover that withstands severe shock and also protects all vital parts of the machine.

Specifications

Net weight, lbs	706	717*
Plate width, inches	27.5	27.5
Amplitude, inches	0.08	0.08
Frequency, vpm	4,080	4,080
Centrifugal force, lbs	9,000	9,000

Engine

	Honda	Hatz
- Model	GX270	1B30
- Rated power, hp	9.0	6.8

Features

Hardox 400 bottom plate

Vibration damped handle

Manual throttle control with stepless speed
(*With electric start on Hatz, net weight 739 lbs)
