VAPOR ABRASIVE BLAST EQUIPMENT

The EQ600S is our high-production, stand-alone unit that attaches to any 375~600 cfm air compressor. It has the ability to blast from 30~140 psi. This unit comes with a hot-dipped galvanized blast pot, stainless steel crash frame, control panel, plumbing and components, and our user-friendly controls. It has a 125-gallon, UV-protected poly tank. All of our units are designed to withstand the toughest conditions. The EQ600S comes standard with 50 feet of blast hose, pneumatic or electric dead man control, and a #8 nozzle. The unit fits in the bed of any standard pickup truck.

- Unparalleled Production Speeds
- Dust Suppression (up to 97% less than conventional blasting)
- Less Media Consumption; Less Cleanup & Disposal
- Easy to Use, Heavy-Duty Components, Exceptionally Reliable

6.5-CF, hot-dipped galvanized, spring-sealed blast pot with auto vent.

Patent pending engineered TRX Flow Dynamics

Compact enough to fit in a standard 6' pick up with tool box.

Heavy duty stainless steel frame, forklift/pallet jack pockets, 5x tested lifting eyes.
